Hello Memoriesbooks Administrator, My name is Isabel and, unlike many emails you may receive, I would like to provide you with a word of congratulations – well done! What for? Part of my job is to review websites, and the work you've done with Memoriesbooks certainly stands out. It's clear you have taken building a website seriously and made a real investment of effort into making it top quality. However, there is, indeed, a question... So, when someone such as me stumbles upon your site – maybe at the top of the search results (great job, by the way) or just through a random link, how do you know? More importantly, how do you make a connection with that person? Studies show that 7 out of 10 visitors leave – they're there one second and then gone. Here's a way to create immediate engagement that you may not have known about... Web Visitors Into Leads is a software widget that works on your site, ready to gather any visitor's Name, Email address, and Phone Number. It lets you know immediately that they're interested – so that you can speak to that lead while they're actually browsing Memoriesbooks. Please see this URL to experience a Live Demo with Web Visitors Into Leads now to see exactly how it works: <https://turboleadgeneration.com> It can be a significant improvement for your business – and it gets even better... once you've gathered their phone number, with our new SMS Text With Lead feature, you can immediately start a text conversation – right away (and there's actually a notable difference between contacting someone within 5 minutes versus 30 minutes.) Additionally, even if you don't close a deal right away, you can follow up later on with text messages for new offers, content links, or just friendly notes to build a relationship. Everything I've described is straightforward, user-friendly, and effective. Please see this URL to learn what Web Visitors Into Leads can do for your business: <https://turboleadgeneration.com> You could be converting significantly more leads today! Salutations to Memoriesbooks Administrator, My name is Lenora, I discovered Memoriesbooks following performing a swift exploration – your site showed up at the top of the listings, so anything you're working on for SEO seems like it's functioning well. So I've got my question – what exactly occurs AFTER a visitor lands on your site? Anything? Studies shows at least 70 percent of the users who find your site, following a brief once-over, they leave... permanently. This means that all of the the time and commitment you invested into making them to come by slips down the tubes. Why would you allow so much excellent effort – and the excellent site you've developed – go to waste? Because the likelihood are they'll just skip over calling or even pulling out their phone, leaving you in the lurch. Nevertheless, here is a suggestion... what if you could make things very easy for an individual to express interest, okay, let's talk about it without needing them to even pull out their phone from their pocket, thanks to cutting-edge new software that can make that first connection NOW. Visit <https://advanceleadgeneration.com> to try out a Live Demo with Web Visitors Into Leads and understand precisely how it works. When targeting leads, you need to respond swiftly – the gap in contacting someone within 5 minutes versus 30 minutes later is significant – like 100 times more effective! That's why you should explore our new SMS Text With Lead capability... once you've captured the phone number of the website visitor, you can seamlessly kick off a text message (SMS) conversation with them.
